

Ortyn and The Aliens

If Somewhere Someone's Out There

*If somewhere someone's out there and you're listening to my song
I hope you'll send a message back to me before too long
I'd like to get to know you and to be your Earthly friend
I'll stay true-blue and loyal too... on that you can depend*

The universe is endless
There might be ten trillion stars
And countless other planets
Some quite likely much like ours

It only stands to reason
That we're far from all alone
And Earth's not the only planet
Conscious beings call their home

*If somewhere someone's out there and you're listening to my song
I hope you'll send a message back to me before too long
I'd like to get to know you and to be your Earthly friend
I'll stay true-blue and loyal too... on that you can depend*

I'm sure so many children
Just like me would love to see
Your flying saucer flying
High above our land and sea

We're waiting here to greet you
So come visit for a while
We'll be happy just to meet you
Yes you'll bring us all a smile

*If somewhere someone's out there and you're listening to my song
I hope you'll send a message back to me before too long
I'd like to get to know you and to be your Earthly friend
I'll stay true-blue and loyal too... on that you can depend*

I'll stay true-blue and loyal too... on that you can depend
