

Ortyn and The Aliens

Pluto's Still a Planet!

*We've heard the news... it's been decreed that Pluto's been demoted
"It's not a planet!" "It's a dwarf!" say all the experts quoted
Well Pluto may be dinky dark and frozen beyond numbness
But this demotion sets the mark for scientific dumbness*

Old Pluto holds five moons in orbit... dry ice-cold and barren
Four itsy bitsy small fry and one super-size called Charon
But if five moons don't qualify to be a planet maker
Then mother Earth who's four moons shy must be a planet faker

Red Mars and cloudy Venus don't reach planet status either
Poor Mercury's so meager that it measures up to neither
These puny worlds with too few satellites should be de-listed
Let's chuck them all... such pure delight just cannot be resisted

*We've heard the news... it's been decreed that Pluto's been demoted
"It's not a planet!" "It's a dwarf!" say all the experts quoted
Well Pluto may be dinky dark and frozen beyond numbness
But this demotion sets the mark for scientific dumbness*

If you've kept score we're down to four... more multi-mooned and famous
Ringed Saturn... Neptune... Jupiter and glorious Uranus
Alas these eerie spheres of gas shall disappear deflated
To prove no planets do exist with facts clearly misstated

Now all you bright astronomers provoking this commotion
Might next employ your pointy heads to poke holes in the ocean
My friends and I sincerely swear that Pluto's still a planet
And unlike you... since we've been there... may we suggest you can it

*We've heard the news... it's been decreed that Pluto's been demoted
"It's not a planet!" "It's a dwarf!" say all the experts quoted
Well Pluto may be dinky dark and frozen beyond numbness
But this demotion sets the mark for scientific dumbness*
